

## PRE-STRETCHED SCREEN

Machine printing frame with mesh is machine welded by 6063 aluminum tube, with excellent weldability, crushing resistance and corrosion resistance. And stretched polyester mesh by kiwo red glue. It is widely used for machine printing, dress printing, arts and crafts gifts, leather, plastic, glass products, etc. Printing process are mainly by manual pipeline operation.

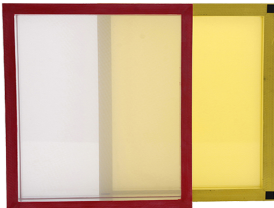

### Popular size

18x20in 20x24in 23x31in

Popular in Americans&European market  
Any size OEM  
20x24in with **110mesh USD7.2/pc**  
(Amazon order one stop OEM)

### Description

Frame size	Custom made
Stretched mesh	10T-165T(25-420MESH)
Adhesive	Kiwo red adhesive from germany
Screen tension	7-30N as customer request
Packing	10pc/ carton or as request

### Feature

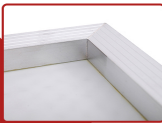

Variety aluminum tube size for customer choose:  
25x25mm, 25x38mm,  
30x30mm, 35x35mm,  
38x38mm, 40x40mm, etc.

Germany Kiwo red glue bonded the mesh. Smooth coating the glue, no spots.

Film+carton+pallet make safety packing

Smooth surface without blot and scratch,

Stable tension, keep same tension at each position.
